

SMC65 – The family grows

The new compression driver we have developed comes to increase our offer in the SM series, a real excellent quality/price family that offers the best Beyma's know-how along with irresistible prices.

This 1.4" high quality compression driver features a ferrite magnet, edgewound aluminium ribbon voice coil and a composite diaphragm assembly. The mylar surround provides damping and avoids typical resonant peaks of metal surrounds, while in the other hand, the pure titanium dome exhibits its unique mechanical properties.

The final result is a professional compression driver with an excellent and accurate response in a real attractive price range.

Just take a look to it in our booth # 8.0 H13.

The general specifications are as follows:

Throat diameter	1.4 in. / 36 mm.
Power capacity	80 w AES above 1 kHz
Program power	160 w above 1 kHz
Sensitivity	107 dB 1 w @ 1m
Frequency range	0.7 - 18 kHz
